People

The Resource Group team is a deeply experienced and long tenured group of experts who love solving business problems with technology.

Process

We combine knowledge of finance, technology, and the engineering process to confidently deliver rock solid implementations. The Resource Group will take the time you need to understand your company and provide you with a solution for more business insight.

Service

The Resource Group serves business by customizing software, refining, and improving business processes, making it easier for customers to make data driven decisions. We value long-term, win-win, high integrity relationships based on mutual trust.

The Partner Makes All The Difference

Selecting the right partner for your business software implementation is crucial. It could truly mean the difference between a failed or successful transition. The Resource Group is dedicated to a unique customer service philosophy. When you first engage with our organization to evaluate an ERP solution, you are getting a partner who is mutually interested in your organization's long-term success. By spending time

initially to evaluate your specific and unique business needs, we are able to recommend the best possible solution for your highest return on investment.

Once you have chosen to work with The Resource Group, we are engaged with you throughout the life cycle of your business software solution.

Our Professional Services and Solutions

The Resource Group implements financial management/ERP software, enabling businesses to gain better insight. We follow a proven implementation process to help minimize costs, reduce risks and deliver business value.

- Reporting and Dashboards
- Multi-Currency Management
- Global Consolidations

"For us, this implementation was nothing short of revolutionary. We went from a heavily manual, decentralized, non-standardized, periodic system to an automated, centralized, standardized, real-time system. These were huge changes. It was not easy. Fortunately we picked very good software and a very good implementation partner."

Kent Gordon
Vice President and Controller
