

Healthcare

Healthcare organizations face many challenges today. Having a solid financial software solution that helps keep costs down and efficiencies high is essential. The Resource Group provides software solutions that help healthcare organizations operate at top efficiency so they can focus on their core business of providing excellent care and service. We work with a variety of healthcare providers and specialize in serving:

"Microsoft Dynamics GP has been a good system for us, but our satisfaction is due in large part to the efforts, support, and professionalism of The Resource Group"

Mary L Herem, CPA
Finance Director
Greater Lakes Mental
Healthcare

- Multi-Site Clinics
- Assisted Living / Long-Term Care Facilities
- Medical Laboratories

Top challenges The Resource Group helps healthcare organizations overcome:

- Lack of visibility into operations
- Struggling with managing multiple pay rates for employees
- Difficulty developing and managing budgets across multiple business units or departments
- Too much manual data entry and duplicate entry taking place
- Disconnected, proprietary information systems.
- Dealing with rising costs and regulatory compliance
- Difficultly accessing financial and patient information quickly
- Hampered by paper-based data collection
- Struggling with tracking materials

Key elements of The Resource Group's Microsoft Dynamics® GP software solution for healthcare:

- Financial Management
- Human Resources and Payroll
- Materials Management
- Forecasting and Budgeting
- Business Intelligence and Dashboards
- Integration with Your Practice Management System
